Side buttons

01 Small sized toilet

Spatial planning Master level

The total length is only 59cm, which is in line with the height of small apartments, leaving more space for use. The bathroom is spacious and easy to store.

02 Zero pressure limit

Zero pressure limit Smooth and unobstructed

The traditional toilet system has high requirements for water pressure. If the water pressure is insufficient, the flushing effect will be affected, and even there may be poor flushing.

The innovative design of smart toilets has completely solved this problem. It is equipped with an efficient water flow control system that can intelligently adapt to various water pressure environments. Regardless of the strength of the household water pressure, it can ensure smooth and unobstructed use every time.

0 water pressure

First

High-speed vortex erosion

Third

Bottom spray straight

Second

Boosting pump assistance

Zero pressure limit Adapt to water pressure environment

Whether in high-rise buildings with low water pressure, this smart toilet can operate stably and always maintain excellent flushing effect.

No additional water pressure boosting device is required, users only need to use it with peace of mind to enjoy an efficient and smooth flushing experience. Each flush is precise and powerful, quickly cleaning the inner wall of the toilet, avoiding blockages or unclean flushing caused by water pressure issues.

Tall buildings

Old community

Peak water usage

Built in foam Save space

The design of built-in foam bottle effectively uses the space inside the toilet, avoiding the trouble of placing additional cleaning bottles outside. Make the bathroom appear more tidy and orderly, while also avoiding the clutter of bottles and cans, making the toilet more compact and simple overall.

Designed in an easy to disassemble and replace form, users can quickly replenish toilet cleaner and maintain it simply.

Removable
back cover

Replace foam bottle

03 Foam Shield

Dense bubbles Prevent splashing

The automatic foaming technology for sitting will evenly apply the toilet cleaning foam to every corner of the toilet, and flow smoothly along the ceramic body of the toilet, ensuring that every inch of the surface can be thoroughly cleaned.

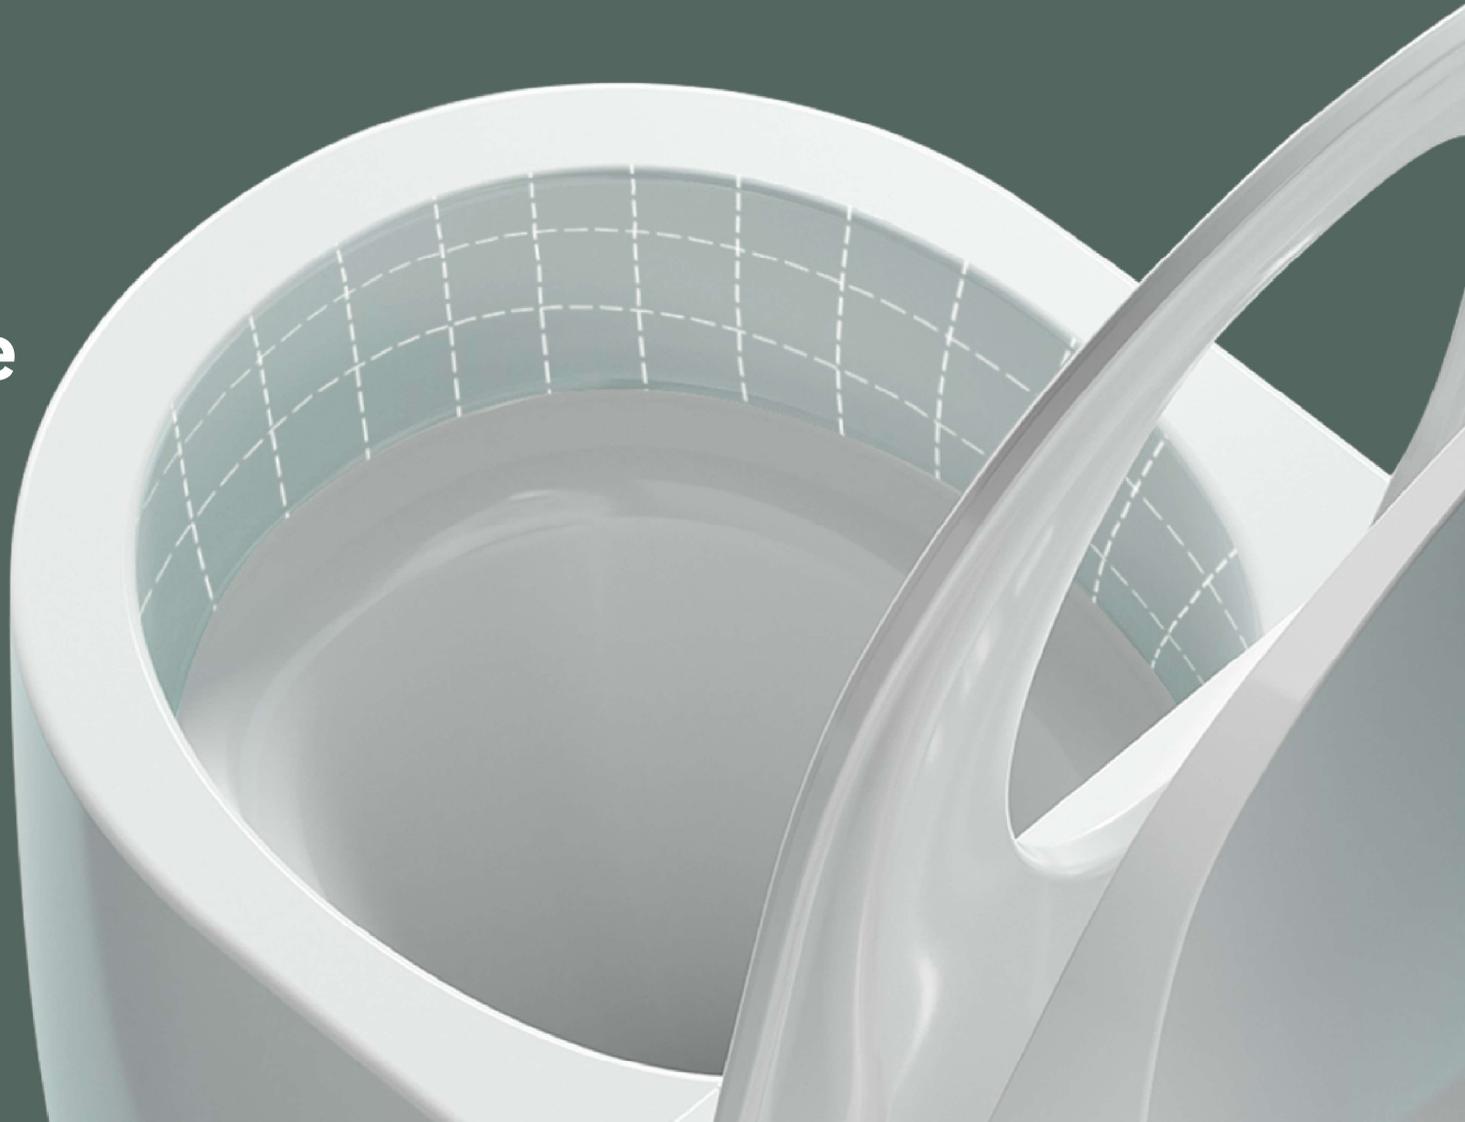

The delicacy and richness of foam quickly cover the inner wall of the whole toilet, forming a mild protective film. The dirt in the toilet will easily fall off without splashing water, and will not splash due to impact, avoiding the embarrassment of splashing dirty water, so as to truly prevent splashing and bacteriostasis.

Lipless design Clean with a wipe

The inner wall of the toilet features a lip free design, with a smooth surface that can be wiped clean immediately

Reject hygiene blind spots, avoid dirt adhesion, and reduce the opportunity to accumulate dirt and grime

05 Ergonomic seat ring

Ergonomics Comfortable Seat ring

Unique curved seat ring, wrapped and supported, legs comfortable for prolonged sitting, fits snugly against the human buttocks, with balanced force points and no pain in the buttocks

3D hip curvature, perfectly fitting the human body

Widening seat ring with a large U, width of 90mm

Sedentary reminder, healthy toileting

06 Automatic sensing

Radar induction Automatic flip cover

Close to the toilet with automatic flip cover, the sensing distance can be freely adjusted, and the sensing lid can be freely switched to close or open, allowing you to use the toilet without contact throughout the entire process, making it cleaner and more hygienic

07 Built in foot feel

Built in foot feel Convenient and beautiful

By placing your feet close to the device, you can flip, circle, and flush, making it convenient for men to use the toilet and urinate. It is more beautiful and clean

Built in foot sensing device

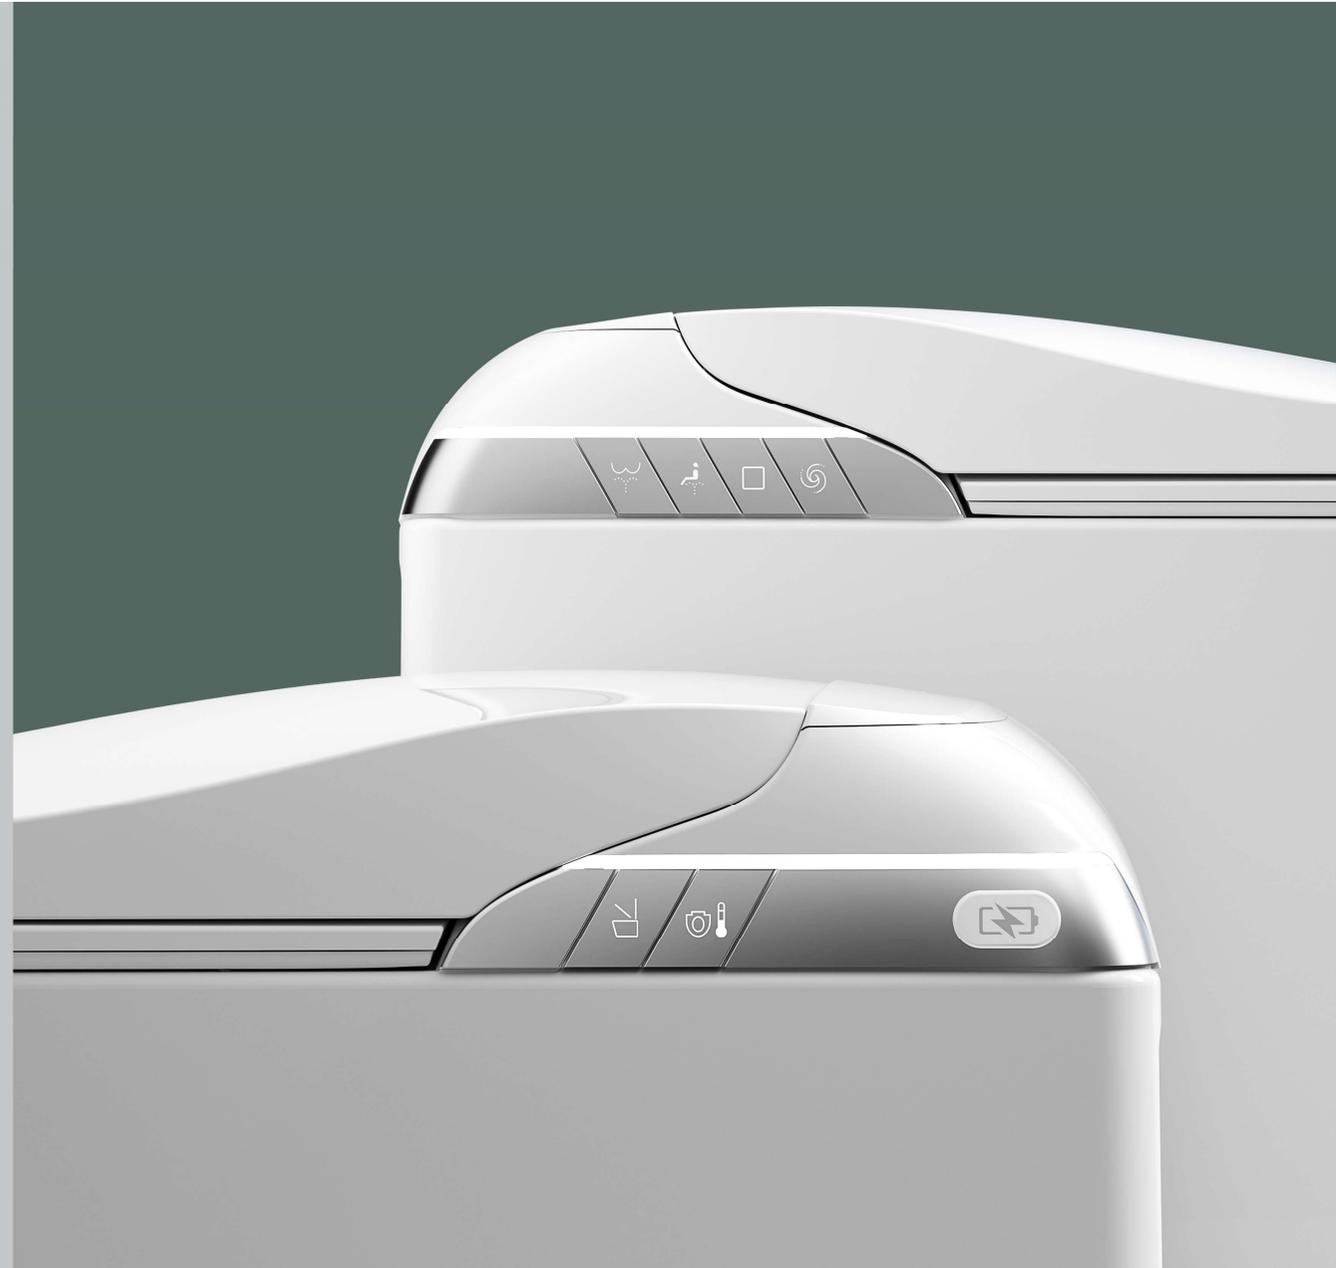

08 Two side buttons

Bilateral button

Easy and convenient

- 1 Hip cleaning**
Press the button to activate the nozzle and release warm water for cleaning.
- 2 Female cleaning**
Specially designed for women to provide gentle cleaning function.
- 3 Warm air drying/stop**
Quickly dry the cleaned area with warm air.
- 4 Flush button**
Pressing it will activate the flushing mechanism.
- 5 Flip cover/flip circle**
Press the control button to flip the cover or circle.
- 6 Seat temperature regulation**
Manually adjust the temperature of the seat ring.

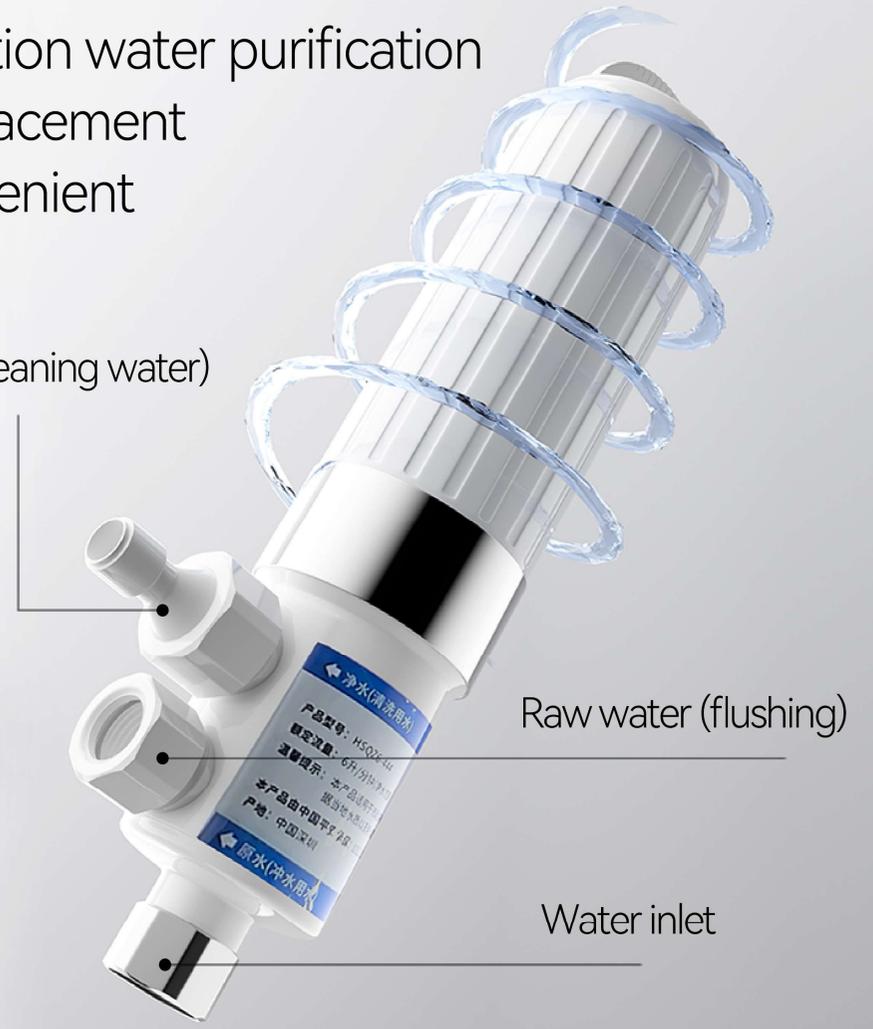

09 External purified water

Independent Water purification Efficient filtration

UF ultrafiltration water purification
External replacement
is more convenient

Purified water (cleaning water)

10 Multidimensional water washing

Fresh water washing

Detachable nozzle

ABS antibacterial material, detachable nozzle,
manual cleaning without hiding dirt
The hot water flow is delicate and soft, skin friendly and comfortable

Four adjustable water temperatures:

- At room temperature
 - 34°C
 - 37°C
 - 40°C
- Comfortable temperature

11 Four season constant temperature

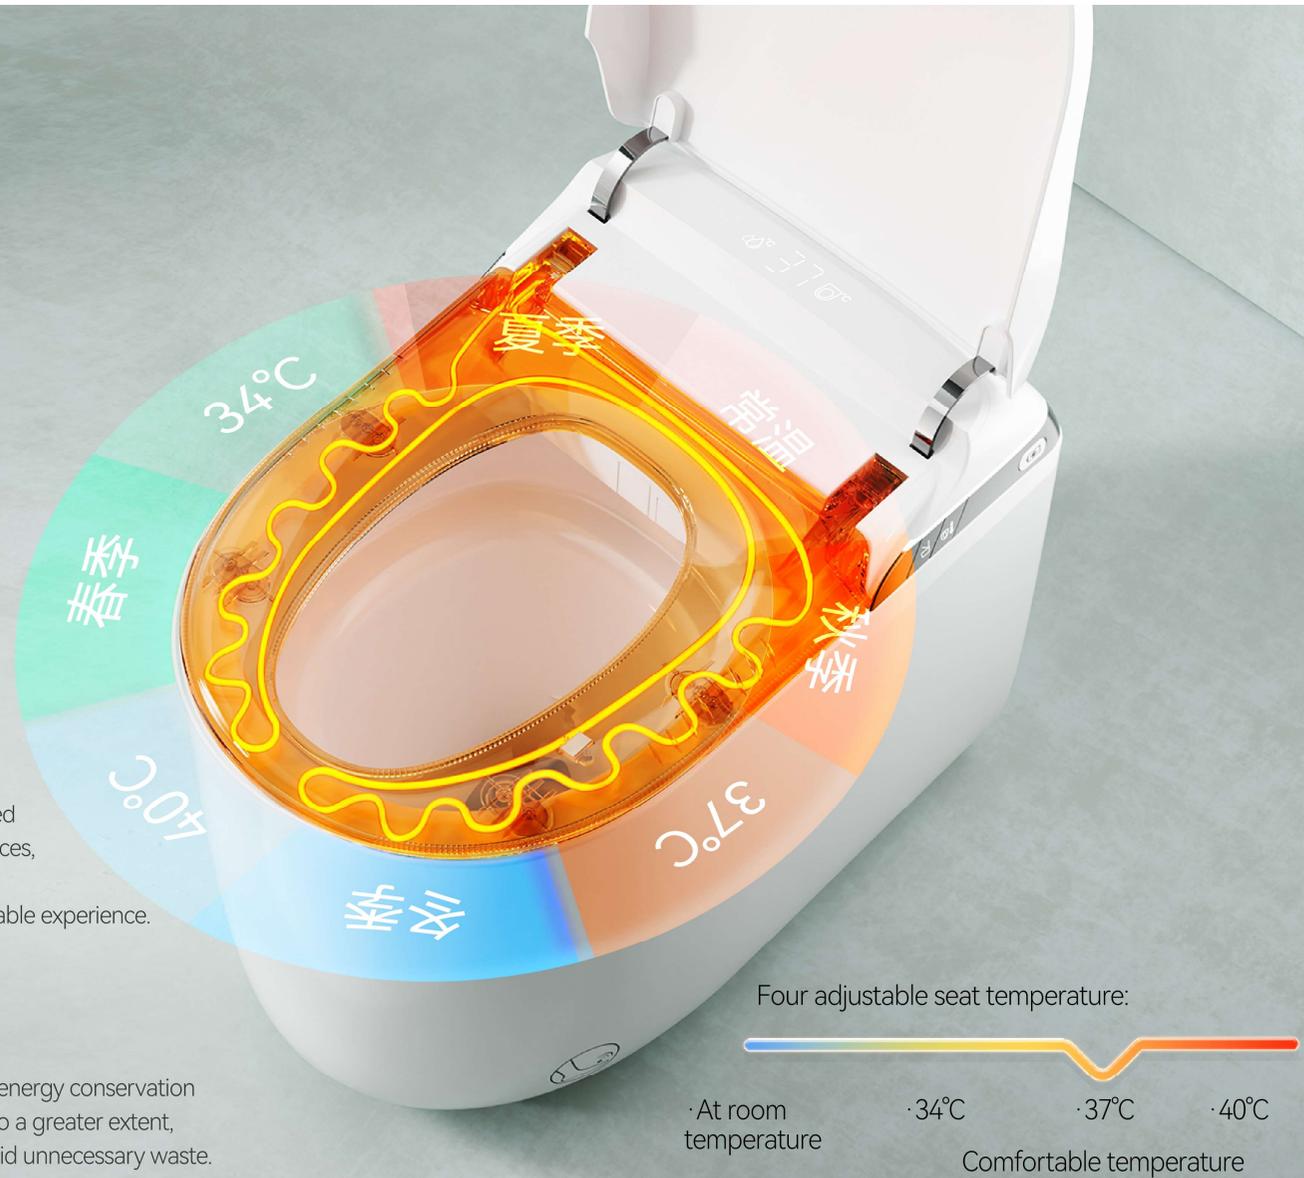

Four season warmth sensation Humanized intelligent control

1 Intelligent temperature control, precise adjustment of comfortable temperature

The temperature of the seat ring can be automatically adjusted according to the ambient temperature and personal preferences, ensuring that it is always within a comfortable range. Flexibly adapt to your needs and create an exclusive comfortable experience.

2 Energy saving and environmentally friendly, long-lasting constant temperature

Seat heating not only focuses on comfort, but also considers energy conservation and environmental protection. Reduce energy consumption to a greater extent, ensure the rational use of energy during the process, and avoid unnecessary waste.

Quick drying Strong and efficient

- 1 High speed and high heat, fast drying without waiting**
Quickly generate strong hot air to dry the moisture on the skin. Whether in environments with heavy moisture or high humidity, the powerful drying function allows you to easily experience the comfort of quick drying without waiting.
- 2 The drying range is larger and wider, easily removing moisture from the skin**
In order to better adapt to the needs of different parts of the human body, the design of the drying air outlet has been optimized, and the blowing range is wider, ensuring that the hot air can evenly cover every corner of the skin.

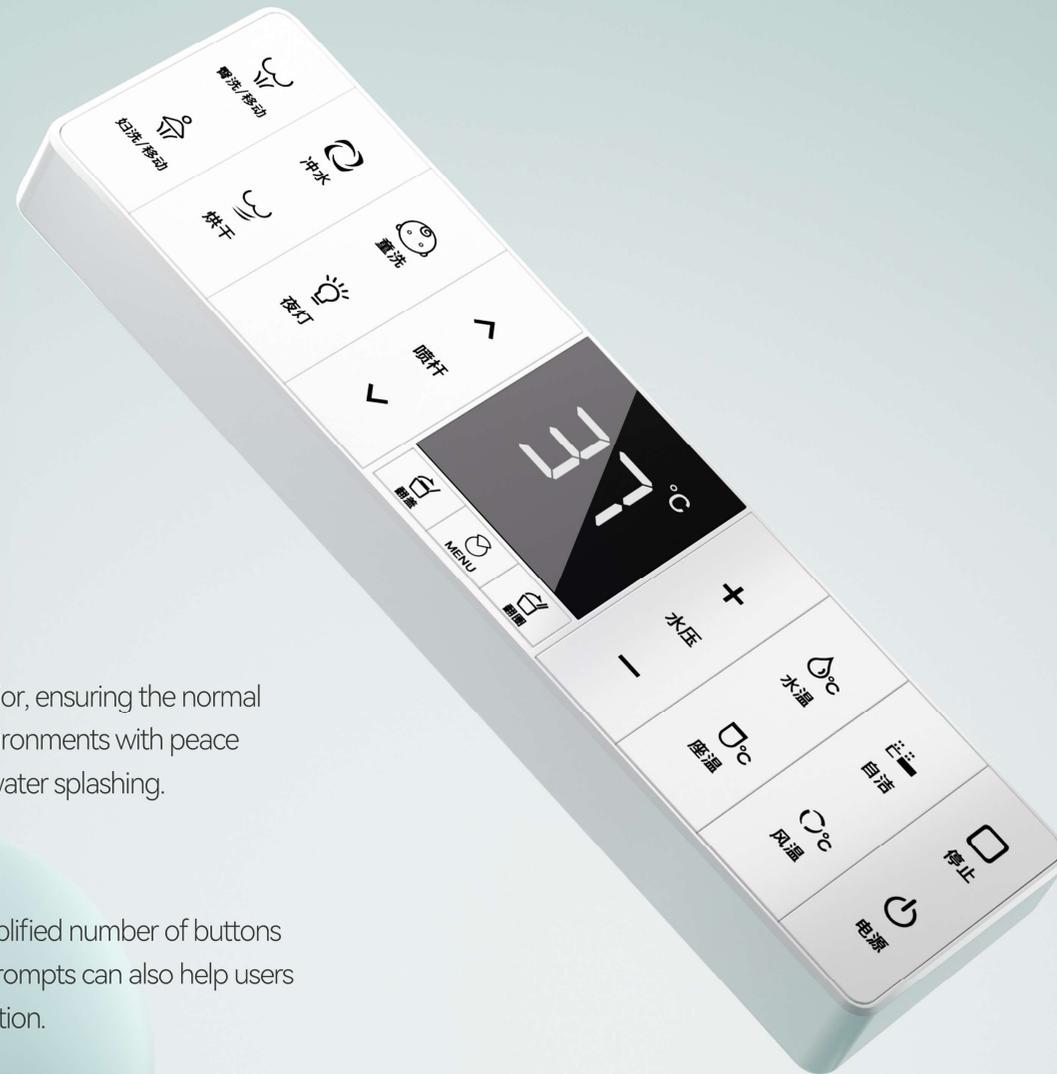

Waterproof Remote control Free mastery

① Waterproof design

Effectively preventing moisture from entering the interior, ensuring the normal use of the remote control, and operating in humid environments with peace of mind, without worrying about damage caused by water splashing.

② Simple operation interface

The interface design is usually very intuitive, with a simplified number of buttons that are large and easy to press. Clear icons and text prompts can also help users quickly identify functions and avoid confusion in operation.

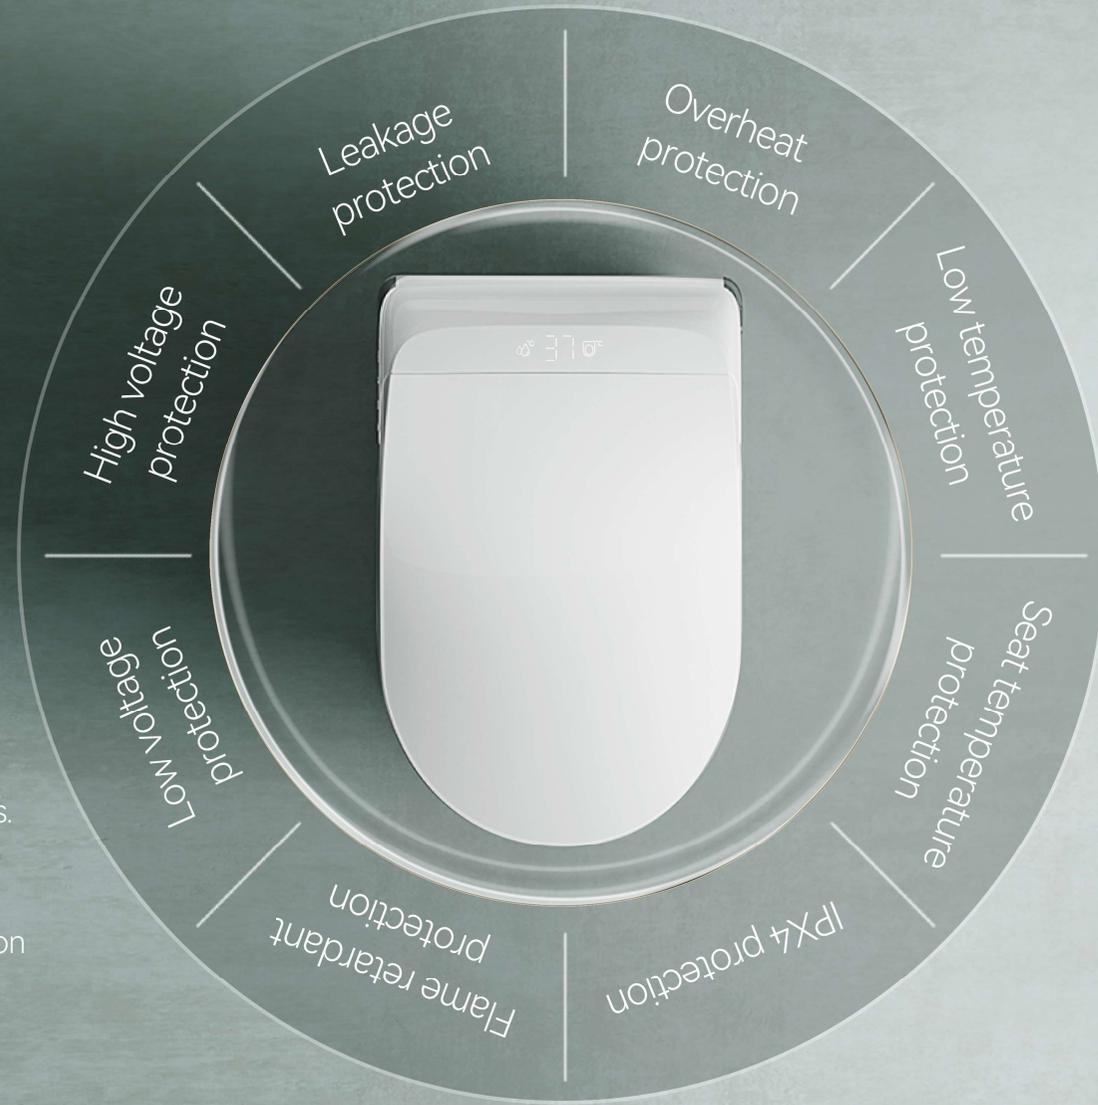

14 Eight major protections

Eight major protections Safe and reassuring

Multiple advanced security protection functions to ensure the safety, health, and comfort of users.

Leakage protection devices and anti water and electricity isolation designs ensure strict separation between electrical components and water flow, avoiding the risk of electric shock.

15 Multi color selection

Different colors Satisfy multiple scenarios
